

CLAMP 180

Σφιγκτήρας ευθυγράμμισης d 63 – d 180

Alignment clamp with angle adjustment (45°/90°) and two clamping elements for heating coil fusion couplers, reducers, and 45° and 90° elbows d 63, d 90, d 125, and d 180. Reduction shells can be inserted for various sizes. Delivered in a practical carrier bag.

Alignment clamp can be expanded with additional clamping element modules for use as fourfold alignment clamp for d 63, d 90, d 125, and d 180. This needs two additional clamping elements.

T-piece extension kit for alignment clamp. Variant with one clamping element. Additional clamping elements can be attached for a twofold alignment clamp on the branching pipe.

Reduction shell set for d 110 and d 160. One reduction shell set is needed for each clamping element.

(The figure is exemplary)

Κωδικός Προϊόντος	Article description	Diameter Area	Weight kg
613021	Alignment clamp with two clamping elements	d 63, d 90, d 125 и d 180	17,000
613022	Additional clamping element	d 63, d 90, d 125 и d 180	5,500
613023	Reduction shell set d 110/d 160	d 110 и d 160	3,000
613024	T-piece extension kit	d 63, d 90, d 125 и d 180	11,000
