

Καπάκι φρεατίου PP με δυνατότητα τελικής επιφάνειας

Material: Polypropylene. The cover's cavity has to be filled with the proper material (as shown in the pictures).

Installation: the recessed cover perfectly fits the REDI catch basin. Always use a frame when closing concrete catch basins or in case of special applications. Once installed, it can be easily lifted off by the central pin.

Durability: as Polypropylene is a plastic corrosion proof material, the REDI recessed cover is the best alternative to metal products subject to deformation due to atmospheric agents and ageing.
