

MR

Συστολικός ηλεκτροσύνδεσμος

With exposed heating coils for optimal heat transfer, large insertion depth, wide fusion zones plus cold zones at the end and in the middle to prevent the flow of molten material, for use without holding devices.

PE 100 SDR 11

Maximum working pressure 16 bar (water)/10 bar (gas)

FRIALEN safety fittings can be fused to pipes SDR11 - SDR17.6 with exception of the dimensions d 125/110 and d 180/125. These dimensions can be fused to pipes SDR9 - SDR26. Minimum wall thickness $s_{min} \geq 3$ mm. Other SDR-stages on request. Please observe the marking directly at the product, which is mandatory. DVGW-Registration Nos. DV-8601AU2248 and DV-8606AU2249

Areas of Application

The FRIALEN Electrofusion Reducer MR is applied for immediate pipe reduction within the pipe system.

Assembly Instructions

Fusing of pipe ends with the FRIALEN Electrofusion Reducers MR takes place by FRIALEN fusion – leakproof and longitudinally strong.

The pipe ends are prepared according to the general installation instructions (note “Assembly Instructions” for FRIALEN Safety Fittings for house connections and distribution pipes (remove oxide layer/clean).

Good reasons for using the FRIALEN Electrofusion Reducers MR:

Large coupler depth for ease of pipe guiding (no holding clamps required)

Extra wide fusion zones

Maximum stability through great wall thickness

Cold zones at the front side and in the middle of the coupler

Exposed heating coil for direct heat transmission to the pipe

Small annular gap for build-up of optimum joining pressure in the fusion zone

Touch proof electric contacts

Fusion indicator for visual fusion control

Durable batch marking

Individually wrapped for dirt protection

Additional barcode for tracing back the underground fitting (Traceability-Coding)
