

W45 SDR 11

Γωνία ηλεκτροσυγκολλησης 45°

With exposed heating coils for optimal heat transfer, large insertion depth, wide fusion zones plus cold zones at the end and in the middle to prevent the flow of molten material, for use without holding devices.

PE 100 SDR 11

Maximum working pressure 16 bar (water)/10 bar (gas)

FRIALEN safety fittings can be fused to pipes SDR11 - SDR 17.6. Minimum wall thickness $s_{min} \geq 3$ mm. Other SDR-stages on request. Please observe the marking directly at the product, which is mandatory. DVGW-Registration Nos. DV-8601AU2248 and DV-8606AU2249

W45 SDR 11

Areas of Application

The FRIALEN-Elbow W45° is used for all changes of direction in HD-PE pipes.

Assembly Instructions

The fusion of the pipe ends with the FRIALEN-Elbows W45° takes place by FRIALEN-fusing – leakproof and longitudinally strong.

The pipe ends are prepared according to the general installation instructions (see Assembly Instructions for FRIALEN-Safety Fittings for house connections and distribution pipes up to d 225). This involves removing the oxide skin and cleaning the pipe ends.

Good reasons for using the FRIALEN-Elbows W45°:

Large coupler depth for ease of pipe guiding (no holding clamps required)

Extra wide fusion zones

Maximum stability through great wall thickness

Cold zones at the front side and in the middle of the coupler

Exposed heating coil for direct heat transmission to the pipe

Small annular gap for build-up of optimum joining pressure in the fusion zone

Contacts safe to touch

Fusion indicator for visual fusion control

Durable batch marking

Individually wrapped for dirt protection

Additional barcode for tracing back the fitting (Traceability-Coding)
