

FRIAFLEX stainless steel repair coupling

Relaxation for the stressed piping system

Stress-free repairs for all common pipes

Ref2620

The FRIAFLEX is ideal for quick, stress-free and thus permanent repairs of transverse fractures of all common pipe materials.

The compact design and an 8° angulation of the FRIAFLEX provides reduction of stress and tension in the pipe networks. The patented gasket enables largest clamping ranges.

Pipe materials:	cast iron, ductile iron, steel, asbestos cement, PVC, GRP, PE*
Casing Bolts:	stainless steel
Sealing sleeve:	EPDM
Angular deflection:	8°
Operating range:	-20°C up to +40°C
Application:	water and municipal wastewater

* for pipelines made of polyethylene, internal support liner have to be used

	DN	d	l	PN
DN80	80	87 - 109	200	16
DN100	100	104 - 129	200	16
DN150	150	158 - 184	200	16
DN200	200	218 - 243	200	16
